

Technology information: WAP

w³/wap – Mobile phone as on-board computer

Data entry by mobile phone: one stop, one click

■ How does your employee use w³/wap?

The display shows your employees next stop. He confirms his arrival with a single click and his mobile phone informs him immediately about consignments to be fetched or delivered. Your employee confirms – either with a simple “ok” or for every load unit, in this case missing items can be assigned an annotation – all data is entered with only a few clicks and without manual text input. And if you like, your customer confirms the receipt entering a PIN code on your employees mobile phone.

■ In which cases is w³/wap most suitable?

Using w³/wap is the best solution if you want to provide your employees fast and reliably with information regarding addresses and shipments. Your employees do not have to enter much data, and it is possible to scan barcodes with an option-

ally attached scanner.

Because of the intuitive usability, you may use WAP also if you work with alternating drivers and subcontractors.

■ Which advantages does w³/wap offer?

- Your employees can work voucher-less. All information is shown on the display of the mobile phone, your employees need neither cartage notes nor an additional note pad.
- You receive high quality data: Inconsistent input is recognised automatically, and the user informed immediately.
- Recorded information is available centrally and immediately: There are no data losses or uncertain transmission times as may occur with text messages.
- There is less adjustment to the job for new employees.
- You work with any WAP enabled mobile phone.
